

CS-25 Advanced Java Programming (J2EE)

BCA Semester – 5

Journal

BCA Department

BCA Department

Laboratory Certificate

This is to certify that Smt./Shri _____
has satisfactory completed **BCA Semester-5** practical experiments of subject **CS-25**
Advance Java Programing (J2EE) during the academic year _____. Her/His
enrollment number is _____ registered at Saurashtra
University, Rajkot.

Date: _____

Subject In-Charge

Head of the Department

Index

Sr.	Name of Experiments	Page No.	Date of Experiment	Date of Supervision	Remarks
	Unit-1				
1	JDBC with MySQL	5			
2	JDBC with Oracle	5			
3	DatabaseMetaData Demo	6			
	Unit-2				
4	RMI Demo	8			
5	HelloWorld Servlet	9			
6	Get Data into Servlet	10			
7	Get Multiple Parameters	12			
8	DropDown ListBox Servlet	14			
9	Servlet Life Cycle	15			
10	Session Tracking Approach	17			
11	Cookies Demo	20			
12	Page Hit Counter Servlet	22			
13	Servlet with JDBC	23			
	Unit-3				
14	HelloWorld JSP	31			
15	JSP Life Cycle	31			
16	JSP Page Directive Example	33			
17	Include Directive Example	33			
18	Scripting Elements	35			
19	Include Action Element	36			
20	Forward/Param Action Element	37			
21	Cookies Demo	38			
22	Session Demo	40			
23	Error Handling	41			
24	JSP with JDBC	42			
	Unit-4				
25	Hibernate with Oracle	47			
	Unit-5				
26	Use of Spring framework	51			
27	Use of Struts framework	52			

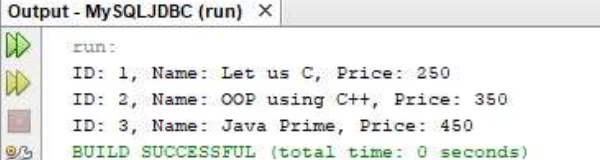

Unit – 1

The J2EE Platform, JDBC (Java Database Connectivity)

1. JDBC with MySQL

```
1 //JDBC with MySql Connectivity...
2
3 package jdbc1;
4 import java.sql.*;
5 public class JDBC1 {
6     public static void main(String[] args) {
7         try{
8             Class.forName("com.mysql.jdbc.Driver");
9             Connection con =
10 DriverManager.getConnection("jdbc:mysql://localhost/College", "root",
11 "");
12             Statement st=con.createStatement();
13             ResultSet rs = st.executeQuery("select * from students");
14             while(rs.next()){
15                 int id = rs.getInt("id");
16                 String sname = rs.getString("sname");
17                 String city = rs.getString("city");
18                 //Display values
19                 System.out.print("ID: " + id);
20                 System.out.print(", Name: " + sname);
21                 System.out.println(", City: " + city);
22             }
23             rs.close();
24             st.close();
25             con.close();
26         }catch(Exception e){
27             e.printStackTrace();
28         }
29     }
30 }
```

Output:

```
run:
ID: 1, Name: Let us C, Price: 250
ID: 2, Name: OOP using C++, Price: 350
ID: 3, Name: Java Prime, Price: 450
BUILD SUCCESSFUL (total time: 0 seconds)
```

2. JDBC with Oracle

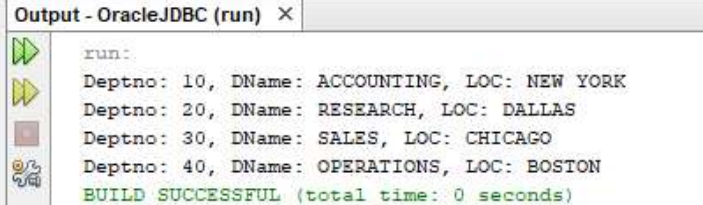

```
1 //JDBC with Oracle Connectivity...
2
3 package jdbc3;
4 import java.sql.*;
5 public class JDBC3 {
6
7     public static void main(String[] args) {
8         try{
9             Class.forName("oracle.jdbc.driver.OracleDriver");
10            Connection con =
11 DriverManager.getConnection("jdbc:oracle:thin:@192.168.10.100:1521:k
12 isdb", "scott", "tiger");
13            Statement st=con.createStatement();
14            ResultSet rs = st.executeQuery("select * from dept");
15            while(rs.next()){
16                int deptno=rs.getInt("deptno");
```

```

15         String dname=rs.getString("dname");
16         String loc=rs.getString("loc");
17         //-----
18         System.out.print("Deptno: "+deptno);
19         System.out.print(", DName: "+dname);
20         System.out.println(", LOC: "+loc);
21     }
22     rs.close();
23     st.close();
24     con.close();
25 }catch(Exception e){
26     e.printStackTrace();
27 }
28 }
29 }

```

Output:

```

run:
Deptno: 10, DName: ACCOUNTING, LOC: NEW YORK
Deptno: 20, DName: RESEARCH, LOC: DALLAS
Deptno: 30, DName: SALES, LOC: CHICAGO
Deptno: 40, DName: OPERATIONS, LOC: BOSTON
BUILD SUCCESSFUL (total time: 0 seconds)

```

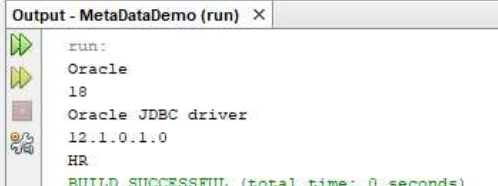

3. DatabaseMetaData Demo

```

1 //DatabaseMetaData Demo
2 package metadatademo;
3 import java.sql.*;
4 public class MetadataDemo {
5     public static void main(String[] args) {
6         try{
7             DatabaseMetaData dbmd;
8             Class.forName("oracle.jdbc.driver.OracleDriver");
9             Connection
10 con=DriverManager.getConnection("jdbc:oracle:thin:@127.0.0.1:1521/xepdb1", "hr", "hr");
11 dbmd=con.getMetaData();
12 System.out.println(dbmd.getDatabaseProductName());
13 System.out.println(dbmd.getDatabaseMajorVersion());
14 System.out.println(dbmd.getDriverName());
15 System.out.println(dbmd.getDriverVersion());
16 System.out.println(dbmd.getUserName());
17 }catch(Exception e){
18     System.out.println(e);
19 }
20 }

```

Output:

```

run:
Oracle
18
Oracle JDBC driver
12.1.0.1.0
HR
BUILD SUCCESSFUL (total time: 0 seconds)

```

Unit – 2

RMI, Servlet

4. RMI Demo

```
1 AddInterface.java
2 -----
3 package rmidemob;
4
5 import java.rmi.Remote;
6 import java.rmi.RemoteException;
7 public interface AddInterface extends Remote {
8     // Declaring the method prototype
9     public int add(int x, int y) throws RemoteException;
10 }
11 -----
12 Impl.java
13 -----
14 package rmidemob;
15
16 import java.rmi.*;
17 import java.rmi.server.*;
18
19 public class Impl extends UnicastRemoteObject implements
20 AddInterface {
21     public Impl() throws Exception {
22         super();
23     }
24     @Override
25     public int add(int x, int y) {
26         return x + y;
27     }
28 }
29 -----
30 Server.java
31 -----
32 package rmidemob;
33
34 import java.rmi.*;
35 import java.rmi.registry.*;
36 public class Server {
37     public static void main(String[] args) throws Exception
38     {
39         try{
40             Registry r =
41 java.rmi.registry.LocateRegistry.createRegistry(1099);
42             r.rebind("CALC", new Impl());
43             System.out.println("Server Started...");
44         }catch(Exception e) {
45             System.out.print("Exception: " + e);
46         }
47     }
48 }
49 -----
50 Client.java
51 -----
52 package rmidemob;
53
54 import java.rmi.*;
55 import java.util.*;
56 public class Client {
```

```

6      public static void main(String[] args) throws Exception {
7          Scanner sc = new Scanner(System.in);
8          System.out.print("Enter first number:");
9          int a = sc.nextInt();
10         System.out.print("Enter second number:");
11         int b = sc.nextInt();
12         int n;
13         try{
14             AddInterface obj =
15             (AddInterface)Naming.lookup("//localhost/CALC");
16             n = obj.add(a, b);
17             System.out.println("Addition= " + n);
18         }catch(Exception e){
19             System.out.println("Exception "+e);
20         }
21     }

```

Output:**5. HelloWorld Servlet Demo**

```
